PERIOD 3:
Regional and Interregional Interactions

c. 600 C.E. to c. 1450
Key Concept 3.1

Although Afro–Eurasia and the Americas remained separate from one another, this era witnessed a deepening and widening of networks of human interaction within and across regions. The results were unprecedented concentrations of wealth and the intensification of cross-cultural exchanges. Innovations in transportation, state policies, and mercantile practices contributed to the expansion and development of commercial networks, which in turn served as conduits for cultural, technological, and biological diffusion within and between various societies. Pastoral or nomadic groups played a key role in creating and sustaining these networks. Expanding networks fostered greater interregional exchanges while at the same time sustaining regional diversity. Islam, a new monotheistic religion, spread quickly through practices of trade, warfare, and the diffusion that was characteristic of this period.

Key Concept 3.2

State formation in this era demonstrated remarkable continuity, innovation, and diversity in various regions. In Afro–Eurasia, some states attempted, with differing degrees of success, to preserve or revive imperial structures, while smaller, less centralized states continued to develop. The expansion of Islam introduced a new concept—the caliphate—to Afro–Eurasian statecraft. Pastoral peoples in Eurasia built powerful and distinctive empires that integrated people and institutions from both the pastoral and agrarian worlds. In the Americas, powerful states developed in both Mesoamerica and the Andean region.

Key Concept 3.3

Changes in trade networks resulted from and stimulated increasing productive capacity, with important implications for social and gender structures and environmental processes. Productivity rose in both agriculture and industry. Rising productivity supported population growth and urbanization but also strained environmental resources and at times caused dramatic demographic swings.

Shifts in production and the increased volume of trade also stimulated new labor practices, including adaptation of existing patterns of free and coerced labor. Social and gender structures evolved in response to these changes.
Key Concept 3.1 — A deepening and widening of networks of human interaction within and across regions contributed to cultural, technological, and biological diffusion within and between various societies.

I. Improved transportation technologies and commercial practices led to an increased volume of trade and expanded the geographical range of existing and newly active trade networks.

A. Existing trade routes—including the Silk Roads, the Mediterranean Sea, the Trans-Saharan routes, and the Indian Ocean basin—flourished and promoted the growth of powerful new trading cities.

B. Communication and exchange networks developed in the Americas.

Illustrative examples, communication and exchange networks:
- Mississippi River Valley
- Mesoamerica
- Andes

C. The growth of interregional trade in luxury goods was encouraged by significant innovations in previously existing transportation and commercial technologies—including the caravanserai, compass use, the astrolabe, and larger ship designs in sea travel—and new forms of credit and the development of money economies.

Illustrative examples, new forms of credit and money economies:
- Bills of exchange
- Credit
- Checks
- Banking houses
- Use of paper money

D. Commercial growth was also facilitated by state practices, including the Inca road system; trading organizations, such as the Hanseatic League; and state-sponsored commercial infrastructures, such as the Grand Canal in China.
Related Thematic Learning Objectives
(Focus of Exam Questions)

Key Concept 3.1 — A deepening and widening of networks of human interaction within and across regions contributed to cultural, technological, and biological diffusion within and between various societies.

SB-5 Explain how societies with states and state-less societies interacted over time.

ECON-3 Explain how different modes and locations of production and commerce have developed and changed over time.

ECON-5 Explain how and why labor systems have developed and changed over time.

ECON-7 Explain how local, regional, and global economic systems and exchange networks have influenced and impacted each other over time.

I. Improved transportation technologies and commercial practices led to an increased volume of trade and expanded the geographical range of existing and newly active trade networks.

(Continued)

E. The expansion of empires—including China, the Byzantine Empire, various Muslim states, and the Mongols—facilitated Afro-Eurasian trade and communication as new people were drawn into their conquerors’ economies and trade networks.

Period 3
Key Concept 3.1

TEACHER-SELECTED EXAMPLES OF HISTORICAL INDIVIDUALS, EVENTS, TOPICS, OR SOURCES FOR STUDENTS TO EXAMINE IN DEPTH
**Key Concept 3.1** — A deepening and widening of networks of human interaction within and across regions contributed to cultural, technological, and biological diffusion within and between various societies.

**II.** The movement of peoples caused environmental and linguistic effects.

**A.** The expansion and intensification of long-distance trade routes often depended on environmental knowledge and technological adaptations to the environment.

Illustrative examples, environmental knowledge and technological adaptations:
- The way Scandinavian Vikings used their longships to travel in coastal and open waters as well as in rivers and estuaries
- The way the Arabs and Berbers adapted camels to travel across and around the Sahara
- The way Central Asian pastoral groups used horses to travel in the steppes

**B.** Some migrations had a significant environmental impact, including migration of Bantu-speaking peoples who facilitated transmission of iron technologies and agricultural techniques in Sub-Saharan Africa, as well as the maritime migrations of the Polynesian peoples who cultivated transplanted foods and domesticated animals as they moved to new islands.

**C.** Some migrations and commercial contacts led to the diffusion of languages throughout a new region or the emergence of new languages.

Illustrative examples, diffusion of languages:
- The spread of Bantu languages
- The spread of Turkic and Arabic languages

**Period 3**

**Key Concept 3.1**

**TEACHER-SELECTED EXAMPLES OF HISTORICAL INDIVIDUALS, EVENTS, TOPICS, OR SOURCES FOR STUDENTS TO EXAMINE IN DEPTH**
Related Thematic Learning Objectives
(Focus of Exam Questions)

**CUL-1** Explain how religions, belief systems, philosophies, and ideologies originated, developed, and spread as a result of expanding communication and exchange networks.

**CUL-2** Explain how religions, belief systems, philosophies, and ideologies affected political, economic, and social developments over time.

**CUL-3** Explain how cross-cultural interactions resulted in the diffusion of culture, technologies, and scientific knowledge.

**CUL-4** Explain how technological and scientific innovations affected religions, belief systems, philosophies, and ideologies over time.

**CUL-5** Explain how the arts are shaped by and reflect innovation, adaptation, and creativity of specific societies over time.

**CUL-6** Explain how expanding exchange networks shaped the emergence of various forms of transregional culture, including music, literature, and visual art.

**SB-3** Explain how and why economic, social, cultural, and geographical factors have influenced the processes of state building, expansion, and dissolution.

**SB-6** Explain the political and economic interactions between states and non-state actors over time.

---

**Key Concept 3.1** — A deepening and widening of networks of human interaction within and across regions contributed to cultural, technological, and biological diffusion within and between various societies.

**III.** Cross-cultural exchanges were fostered by the intensification of existing, or the creation of new, networks of trade and communication.

A. Islam, based on the revelations of the prophet Muhammad, developed in the Arabian Peninsula. The beliefs and practices of Islam reflected interactions among Jews, Christians, and Zoroastrians with the local Arabian peoples. Muslim rule expanded to many parts of Afro–Eurasia due to military expansion, and Islam subsequently expanded through the activities of merchants, missionaries, and Sufis.

B. In key places along important trade routes, merchants set up diasporic communities where they introduced their own cultural traditions into the indigenous culture.

Illustrative examples, diasporic communities:
- Muslim merchant communities in the Indian Ocean region
- Chinese merchant communities in Southeast Asia
- Sogdian merchant communities throughout Central Asia
- Jewish communities in the Mediterranean, Indian Ocean basin, and along the Silk Roads

C. As exchange networks intensified, an increased number of travelers within Afro–Eurasia wrote about their travels.

Illustrative examples, travelers:
- Ibn Battuta
- Marco Polo
- Xuanzang

---

**Period 3**
Key Concept 3.1
**Key Concept 3.1** — A deepening and widening of networks of human interaction within and across regions contributed to cultural, technological, and biological diffusion within and between various societies.

III. Cross-cultural exchanges were fostered by the intensification of existing, or the creation of new, networks of trade and communication.

(Continued)

D. Increased cross-cultural interactions resulted in the diffusion of literary, artistic, and cultural traditions, as well as scientific and technological innovations.

Illustrative examples, diffusion of literary, artistic, and cultural traditions:

- The spread of Christianity throughout Europe
- The influence of Neoconfucianism and Buddhism in East Asia
- The spread of Hinduism and Buddhism into Southeast Asia
- The spread of Islam in Sub-Saharan Africa and Asia
- The influence of Toltec/Mexica and Inca traditions in Mesoamerica and Andean America

---

**Related Thematic Learning Objectives**

(Focus of Exam Questions)

**ECON-7** Explain how local, regional, and global economic systems and exchange networks have influenced and impacted each other over time.

**SOC-1** Evaluate the extent to which distinctions based on kinship, ethnicity, class, gender, and race influenced the origins, development, and transformations of social hierarchies.

**SOC-2** Evaluate the extent to which different ideologies, philosophies, and religions affected social hierarchies.

**SOC-5** Explain how social categories, roles, and practices have been maintained or challenged over time.

**SOC-6** Explain how political, economic, cultural, and demographic factors have affected social structures over time.

---

**Period 3**

**Key Concept 3.1**

Related Thematic Learning Objectives
(Focus of Exam Questions)

**ENV-3** Evaluate the extent to which migration, population, and urbanization affected the environment over time.

**ENV-5** Evaluate the extent to which the development of diverse technologies, industrialization, transportation methods, and exchange and communication networks have affected the environment over time.

**ECON-7** Explain how local, regional, and global economic systems and exchange networks have influenced and impacted each other over time.

**Key Concept 3.1** — A deepening and widening of networks of human interaction within and across regions contributed to cultural, technological, and biological diffusion within and between various societies.

IV. There was continued diffusion of crops and pathogens, including epidemic diseases like the bubonic plague, along trade routes.

Illustrative examples, diffusion of crops:
- Bananas in Africa
- New rice varieties in East Asia
- The spread of cotton, sugar, and citrus

Period 3

<thead>
<tr>
<th>I.</th>
<th>Empires collapsed in different regions of the world, and in some areas were replaced by new imperial states or political systems.</th>
<th>Illustrative examples, traditional sources of power and legitimacy:</th>
</tr>
</thead>
</table>
| A. | Following the collapses of empires, imperial states were reconstituted in some regions, including the Byzantine Empire and the Chinese dynasties (Sui, Tang, and Song), combining traditional sources of power and legitimacy with innovations better suited to their specific local context. | • Patriarchy  
• Religion  
• Land-owning elites  
Illustrative examples, innovations:  
• New methods of taxation  
• Tributary systems  
• Adaptation of religious institutions |
| B. | In some places, new political entities emerged, including those in various Islamic states; the Mongol khanates; new Hindu and Buddhist states in South, East, and Southeast Asia; city-states; and decentralized government (feudalism) in Europe and Japan. | Illustrative examples, city-states:  
• Those on the Italian peninsula  
• Those in East Africa  
• Those in Southeast Asia |
| C. | Some states synthesized local with foreign traditions. | Illustrative examples, synthesis by states:  
• Persian traditions that influence Islamic states  
• Chinese traditions that influence states in Japan |
| D. | In the Americas, as in Afro–Eurasia, state systems expanded in scope and reach; networks of city-states flourished in the Maya region and, at the end of this period, imperial systems were created by the Mexica (Aztecs) and Inca. |

**ECON-7** Explain how local, regional, and global economic systems and exchange networks have influenced and impacted each other over time.

### Key Concept 3.2 — State formation and development demonstrated continuity, innovation, and diversity in various regions.

**II.** Interregional contacts and conflicts between states and empires encouraged significant technological and cultural transfers.

#### A. Technological and cultural transfers were taking place:
- between Tang China and the Abbasids;
- across the Mongol Empire;
- between Muslims and Christians in the Mediterranean region during the Crusades; and
- during Chinese maritime activity led by Ming Admiral Zheng He.

#### Illustrative examples, technological and cultural transfers:
- The spread of Islamic scientific knowledge to Mongol China
- The transfer of Greco-Islamic medical knowledge to Western Europe
- The transfer of foods, technologies, textiles, and music from the Islamic world to Europe via Al-Andalus

Key Concept 3.3 — Changes in trade networks resulted from and stimulated increasing productive capacity, with important implications for social and gender structures and environmental processes.

II. The fate of cities varied greatly, with periods of significant decline and periods of increased urbanization buoyed by rising productivity and expanding trade networks.

A. Multiple factors contributed to the decline of urban areas in this period, including invasions, disease, and the decline of agricultural productivity.

B. Multiple factors contributed to urban revival, including the end of invasions, the availability of safe and reliable transport, the rise of commerce and warmer temperatures between 800 C.E. and 1300, increased agricultural productivity and subsequent rising population, and greater availability of labor.

- **ECON-5** Explain how and why labor systems have developed and changed over time.

**Key Concept 3.3** — Changes in trade networks resulted from and stimulated increasing productive capacity, with important implications for social and gender structures and environmental processes.

**III.** Despite significant continuities in social structures and in methods of production, there were also some important changes in labor management and in the effect of religious conversion on gender relations and family life.

- **A.** The diversification of labor organization that began with settled agriculture continued in this period. Forms of labor organization included free peasant agriculture, nomadic pastoralism, craft production and guild organization, various forms of coerced and unfree labor, government-imposed labor, and military obligations.

- **B.** As in the previous period, social structures were shaped largely by class and caste hierarchies. Patriarchy continued; however, in some areas, women exercised more power and influence, most notably among the Mongols and in West Africa, Japan, and Southeast Asia.

- **C.** New forms of coerced labor appeared, including serfdom in Europe and Japan and the elaboration of the *mit'a* in the Inca Empire. Peasants resisted attempts to raise dues and taxes by staging revolts. The demand for slaves for both military and domestic purposes increased, particularly in central Eurasia, parts of Africa, and the eastern Mediterranean.

**Illustrative examples, regions where free peasants revolted:**
- China
- The Byzantine Empire

**Key Concept 3.3** — Changes in trade networks resulted from and stimulated increasing productive capacity, with important implications for social and gender structures and environmental processes.

III. Despite significant continuities in social structures and in methods of production, there were also some important changes in labor management and in the effect of religious conversion on gender relations and family life.

(Continued)

**D.** Buddhism, Christianity, Islam, and Neoconfucianism were adopted in new regions and often caused significant changes in gender relations and family structure.

Illustrative examples, changes in gender relations and family structure:

- Divorce for both men and women in some Muslim states
- The practice of foot binding in Song China
- Female monastic orders in Christianity and Buddhism
